SUMMARY

Full Stack Developer with **2.5+ years of experience** delivering scalable web and mobile applications using **React, Node.js, and TypeScript**. Experienced in **high-concurrency backend architectures**, real-time systems (**WebSockets**), RESTful API design, and end-to-end feature delivery from schema design to production.

TECHNICAL SKILLS

Languages & Frontend: TypeScript, JavaScript, React, Next.js, Redux Toolkit, React Native, TanStack Query, Tailwind CSS

Backend & Databases: Node.js, Express, Fastify, REST APIs, WebSockets, Microservices, PostgreSQL, MongoDB, Redis, MySQL

DevOps & Cloud: AWS (Lambda, S3, RDS), Docker, Docker Compose, CI/CD (GitHub Actions), Git, Nginx

Tools & Methodologies: Claude Code, System Design, Agile/Scrum, Code Reviews, Git Flow, Figma, Postman

PROFESSIONAL EXPERIENCE

Full Stack Developer

Aug 2023 – Present

Neomenta (Startup)

Ahmedabad, India

- Served as a core engineer scaling the cross-platform ecosystem (**React, React Native, Node.js**) from early-stage MVP to **1,000+ active customers**, optimizing client performance and backend throughput.
- Built the **Studio Field Mapping Engine**—a visual data mapper auto-mapping **50+ fields** across forms, spreadsheets, and pipelines, **reducing manual setup time by 90%** and eliminating configuration errors.
- Built a reusable **React component library**, **reducing overall frontend development time by 40%**.
- Developed a lightweight **custom lexical parser** in React, processing unformatted stream input into **structured token trees** to support nested markdown-style formatting and colored text rendering.
- Built a **snapshot-based version control system** for JSON configurations using **RFC 6902 JSON patches** and a custom timeline UI for seamless state restores.
- Engineered an end-to-end **media management service**, unifying platform asset ingestion services and **AWS S3 cloud storage**.
- Developed **real-time analytics dashboards** using **Chart.js** and **WebSocket data feeds**, enabling data-driven decision-making across client platforms.

TECHNICAL PROJECTS

Sentinel-Invoice — AI Invoice Anomaly Detection (LLM Integration)

TypeScript, LangGraph, Gemini 2.5 Flash, Groq Llama 3.3, React 19, PostgreSQL, Docker

- Built a full-stack autonomous AI auditing system — **LangGraph agent pipeline** with PDF OCR, structured LLM extraction, real-time vendor verification, multi-model trust scoring, and human-in-the-loop workflow — **reducing manual invoice review time by ~60%**.

FlashCommerce — High-Traffic Flash Sale Backend

Node.js, TypeScript, Fastify, PostgreSQL, Redis, Stripe, Jest, Docker

- Engineered a high-concurrency Node.js e-commerce backend handling **10K+ users**, using atomic **Redis Lua scripts** to eliminate inventory race conditions with PostgreSQL + Redis transactions, webhooks. Designed and implemented scalable RESTful APIs using Node.js and Express.js, integrating PostgreSQL for efficient data management and high-performance backend services.

ACHIEVEMENTS & LEADERSHIP

- Delivered **870+ commits** and **80,000+ lines of production code** across web and mobile codebases over 2.5 years at Neome.ai.
- Led the **CodeChef College Chapter**, mentoring **100+ students** in web development and competitive programming.

EDUCATION

B.Tech in Computer Engineering

2020 – 2024

Charusat University

CGPA: 8.8 / 10.0
