PROFESSIONAL SUMMARY

Full-Stack Developer with **2.6+ years of production experience** shipping React.js web apps, high-performance React Native mobile apps (iOS + Android), and scalable Node.js backends. Core team member at a B2B SaaS startup (Neome.ai) where I contributed to growth from **0 to 1,000+ enterprise customers**. Shipped a **230+ component design system**, migrated WebSocket calls to RPC for reliability, and built a visual field-mapping engine that cut customer onboarding time by **~90%**. Recently upskilled in **LLM integration** (LangGraph, LangChain) and shipped two production-grade side projects during my transition.

PROFESSIONAL EXPERIENCE

Software Engineer — Neome.ai (Neomenta), Ahmedabad

Aug 2023 – Feb 2026 | Enterprise SaaS platform for form building, workflow automation & data management

- **Shipped** React.js web apps and React Native mobile apps end-to-end — media pipeline (compression, multi-format preview), Vision Camera QR/barcode scanning, iOS/Android-specific optimizations, and reusable component architecture.
- **Architected scalable Node.js backend services** — REST APIs, WebSocket streams, Server-Sent Events, Redis caching — powering live analytics dashboards with **sub-second updates and 99.9% uptime**; migrated high-frequency WebSocket calls to RPC architecture, improving API reliability.
- **Built the Studio Field Mapping Engine** — a visual data mapper auto-mapping 50+ fields across forms, spreadsheets, and automation pipelines, **reducing manual setup time by ~90%** and eliminating configuration errors.
- **Optimized performance** — diffing algorithms and WebSocket sync for a drag-and-drop Workflow Builder (**30% faster rendering**); timezone refactor across 40+ components (**~80% fewer date bugs**).
- **Integrated third-party services** — Google Maps, Firebase Auth, Azure MSAL, OAuth 2.0 (Google, Microsoft, WhatsApp sign-in) — improving sign-in conversion.
- **Architected a 230+ component design system** shared across web and mobile with WCAG 2.1 AA accessibility; **resolved 135+ production bugs** including crash fixes and memory leaks.

Tech: React.js, React Native, TypeScript, JavaScript, Node.js, Redux Toolkit, Material UI, REST APIs, WebSockets, Server-Sent Events, Redis, Firebase Auth, OAuth 2.0, Google Maps API, Git, GitHub

Frontend Developer Intern — TatvaSoft, Ahmedabad

Jan 2023 – Jun 2023

- Built responsive client-facing UI modules in React and TypeScript, collaborating with senior engineers on component development, code reviews, and agile delivery.

TECHNICAL PROJECTS (BUILT DURING RECENT TRANSITION)

Sentinel-Invoice — AI Invoice Anomaly Detection (LLM Integration)

TypeScript, LangGraph, Gemini 2.5 Flash, Groq Llama 3.3, React 19, PostgreSQL, Docker

- Built a full-stack autonomous AI auditing system — LangGraph agent pipeline with PDF OCR, structured LLM extraction, real-time vendor verification, multi-model trust scoring, and human-in-the-loop workflow — **reducing manual invoice review time by ~60%**.

FlashCommerce — High-Traffic Flash Sale Backend

Node.js, TypeScript, Fastify, PostgreSQL, Redis, Stripe, Jest, Docker

- Engineered a high-concurrency Node.js e-commerce backend handling **10K+ concurrent users**, using atomic Redis Lua scripts to eliminate inventory race conditions — processing **500+ orders/minute** with distributed PostgreSQL + Redis transactions, secure Stripe webhooks, and 85% Jest coverage.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend	React.js, React Native (iOS + Android), Redux Toolkit, Material UI, Cross-Platform Mobile, Performance Optimization, WCAG 2.1 AA
Backend	Node.js, Express.js, FastAPI, REST APIs, WebSockets, Server-Sent Events, RPC architecture, Microservices, System Design
Databases	PostgreSQL, MongoDB, Redis
Auth & APIs	Firebase Auth, OAuth 2.0 (Google, Microsoft, WhatsApp), Azure MSAL, Google Maps API, Stripe Webhooks
DevOps & Tools	Git, GitHub, GitHub Actions, Docker, Postman, AWS, Jira, Agile/Scrum
AI / LLM	Claude Code, Cursor, GitHub Copilot, LLM Integration (LangGraph, LangChain, Gemini, Groq)

ACHIEVEMENTS & LEADERSHIP

- Delivered **870+ commits** and **80,000+ lines of production code** across web and mobile codebases over 2.5 years at Neome.ai.
- Led the CodeChef College Chapter, **mentoring 100+ students** in web development and competitive programming.

EDUCATION

B.Tech in Computer Engineering — Charusat University

2020 – 2024 | CGPA: 8.8 / 10
